174.	All goods, wares and merchandise, not provided for under any other heading in the Tariff or under any special law relating to the Customs	<i>ad valorem</i> 20 per cent.
------	--	--------------------------------

GENERAL NOTES.

The headings of the respective classes in this Schedule are used only for convenience of classification, and shall not in any way affect the interpretation of the Tariff.

"n.e.e." means "not elsewhere enumerated."

The term "in bulk," when it appears in the Tariff, means—

(a) goods loose without packing, or loose in barrels, casks, or any other single outside package, but not including goods imported by parcel post;

(b) when in internal packages, that the net contents of any immediate container of goods weigh not less than ten pounds or measure not less than one imperial gallon.

Goods chargeable with duty by weight are, except where otherwise provided for, charged with duty on the net weight, which may be arrived at either by weighing net, or deducting from the gross weight the actual tare or an average tare agreed to by the importer.

Tins, jars, bottles and other receptacles of reputed weight or content to be deemed not less than such weight or content.

Twenty-four reputed half-pints, twelve reputed pints, six reputed quarts, or four reputed imperial quarts to be deemed to be not less than one gallon.

Cement in packages of not less than 350 lbs. and not more than 400 lbs. to be deemed 400 lbs.

Oils and motor spirits in ordinary reputed two five-American-gallon or ten one-American-gallon tins to be deemed to be not less than 8½ imperial gallons, and two reputed four-gallon tins to be deemed to be not less than eight imperial gallons.

"Proof" shall mean the strength of proof as ascertained by Sykes' hydrometer.

"Proof spirits" shall mean spirits which, at a temperature of 51 degrees Fahrenheit, weigh 12/13ths of an equal volume of distilled water at the same temperature.

A complete article imported in an unassembled condition, except where specially provided for, is liable to the rate of duty which would be applicable to that article if imported in a fully set up condition, notwithstanding that the constituent parts are packed separately and are separately provided for elsewhere in the Tariff.

Integral parts of an article which is liable to an *ad valorem* duty, or is free of duty, imported for replacement purposes, or as spare parts, shall be liable to the same rate of duty as the article itself, or free of duty as the case may be, unless they are specifically excluded, or provided for elsewhere, in the Tariff.

Regarding "Suspended duties," see Section 6 of the Customs Tariff Ordinance, 1930.

Customs—*continued.*

B. WAREHOUSING CHARGES.

EXPLANATORY NOTE.

Kenya and Uganda being one Administrative unit for purposes of Customs, complete freedom of trade between the territories exists. For this reason, and on account of the very intimate trade connection between the countries, a detailed examination of the external trade of each territory separately is a matter of very considerable difficulty, particularly in view of the fact that virtually the whole of the imports and exports of the Dependencies pass through Mombasa, the principal port of Kenya. In consequence, the trade figures represent generally the landed value at Mombasa in the case of imports and the "f.o.b. Mombasa" value in the case of exports, these being the declared values for purposes of Customs.

Separate statistics for Uganda are, in many cases, not available. For complete statistics of the two Dependencies combined, reference is invited to the Annual Trade Report of Kenya and Uganda and to the corresponding section of the Blue Book of the Kenya Colony and Protectorate.

General Information Regarding the Industry and Possibility of Development.

There are seven firms operating eight mills for the conversion of Government owned trees and selling lumber through a central organization known as The Uganda Timber Sales, Ltd. The members of this company have exclusive cutting rights over approximately 200 square miles of Government forest. Regeneration is carried out by the Forest Department.

The principal timbers cut are Iroko (muvule—*Chlorophora excelsa*), Uganda Mahogany (Munyama—*Khaya anthotheca*) and Uganda Sapele (Miovu—*Entandrophragma* spp.). Various other timbers ranging from very heavy and durable constructional woods to light, soft timbers are available.

A cess on all Government timber cut is paid into a fund administered by a Timber Industry Committee for the improvement and development of the trade through the agency of The Uganda Timber Sales, Ltd. An Export of Timber Ordinance prohibits the export of the principal timbers unless they conform to certain grades based on the Grading Rules for Empire Hardwoods, prepared by the Imperial Institute Advisory Committee on Timbers.

Iroko timber is in good demand in Europe and endeavours are being made to work up export markets for the various mahoganies. Probable lines of future development include a local plywood and veneer factory and large scale manufactures of box-boards.

A fluctuating number of small firms work small portable mills in private forests in Buganda and the Sesse Islands. These forests are small and scattered and are being worked without any steps being taken towards regeneration.

3. Iron ore is smelted, but only in insignificant quantities, by natives. Brick clay, terite and other common building materials are excavated to meet local requirements and nestone is available in certain areas. Production figures are not available.

4. *Copper.*—Operations at the Kilembe (Ruwenzori) prospect of the Tanganyika Concession, Ltd., were confined to care and maintenance.

5. Further gold discoveries were made, both in the Eastern and Western Provinces. Production of tantalite declined, local ores being of complex nature and not readily marketable. Scheelite was reported for the first time.

6. Drilling for oil was commenced in the Lake Albert Region and is still proceeding.

7. Special attention was given to anti-soil erosion work and surface catchment schemes, and to the development of ground water supplies by drilling. Geophysical methods were successfully employed in the location of drilling sites. A report, Memoir No. 4 of the Geological Survey, dealing with soil erosion and water supplies, was published together with Bulletin No. 3.

BRITISH EAST AFRICAN METEOROLOGICAL SERVICE.

All Meteorological Stations have been under the control of the B.E.A. Meteorological Service throughout 1938.

In connection with the Service 173 Rainfall Stations have reported, including one First Order Station, fourteen Second Order Stations, one Third Order Station and fifty-six Rainfall Stations which were opened during the year.

The times of observations are :—

8-30 a.m. and 2-30 p.m. Local Standard Time. This corresponds to 0545 G.M.T. and 1145 G.M.T. When the standard time was changed at the beginning of 1937, it was considered inadvisable to alter the local times of observation so that, in reality, the observations are now made 15 minutes earlier than the International Times of 0600 G.M.T. and 1200 G.M.T.

Only a summary of the observations at selected stations is given in this volume. Further information may be obtained on application to the B.E.A. Meteorological Service.

Rainfall.

The total rainfall for the year was 11% below normal. February was unusually dry, the total rainfall being 60% below average.

The abnormalities at certain stations are shown in the following table :—

Station.	Province.	Departure from normal.	Station.	Province.	Departure from normal.

The highest fall for the year was 111·59 inches at Kalangala, and the lowest 26·20 inches at Butiaba. The greatest fall recorded in 24 hours was 4·70 inches on the 16th June at Kaberamaido.

Temperatures.

Forty-one Stations recorded temperatures during 1938. Of these, thirty recorded readings of the Dry and Wet Bulb thermometers.

The highest temperature recorded was 99·2°F. at Mbale in February, and the lowest 40·0°F. at Kabale in January.

The departures from normals for the various stations are shown below :—
